Professional Summary

Targeting full-stack developer roles with an organization of high reputation with opportunities for continuous learning and career growth. Demonstrated ability to manage and deliver projects efficiently from planning and design to deployment and maintenance. Committed to staying updated with the latest industry trends and technologies to build innovative and scalable solutions.

Projects

Blog Application with Authentication

Tools: React, Appwrite, Redux

- Developed a full-featured blog application allowing users to register, authenticate, and manage blog posts.
- Built a responsive and intuitive frontend using React.
- Implemented secure authentication and authorization using Appwrite.
- Managed backend services, including database and user management with Appwrite.
- Used Redux for predictable and centralized state management.

Currency Converter

Tools: React, API Integration

- Created a sleek web application to convert currencies using real-time exchange rates.
- Integrated third-party APIs to fetch and display updated conversion data.
- Designed a clean and user-friendly interface for seamless user experience.
